# kiss\* digital media

introducing  
1stbase.ai; the  
world's first  
meta-cms and  
'anything' builder

Don't know what that means?

Imagine something like Wordpress, but instead of updating just your website, you're also automatically updating your app, your Facebook apps, your PDF brochures, your chatbot, email templates, and so much more! All real-time, at the same time. All included.

And the kicker? 1stbase is infinitely quicker and easier to use, and has been tried and tested for 2 years with real people from all ages and technical skills.
